Ali, M. and J. Peerlings (2011). Value added of Cluster Membership for Micro Enterprises of the Handloom Sector in Ethiopia. *World Development*, 39(3): 363–374.

**Challenges facing the EAAE:** Given the interdisciplinary issues at stake in agriculture, food industry and rural areas agricultural economists face more and more competition from other science fields. Besides a threat this is also an opportunity. The EAAE has in the light of this to (re)define and position its role. I hope to contribute to this discussion using my background as editor of the *European Review of Agricultural Economics* and experience in both disciplinary and interdisciplinary research.

**What I would like to see achieved in the next Board period (September 2020 – August 2023):** I consider it my task to let the organisation run as smoothly as possible. Moreover, I hope to be able to increase the involvement of the members with the EAAE.
